

Plant Assist Production & Assembly

One-stop solution for
light to heavy gauge stamping

Armor Metalstamp offers valuable client plant assist services, providing temporary production of metal stampings and blanks due to overflow at the client's facility. We can assist in low to high-volume jobs and production runs. If a client's equipment breakdown, we can help with production needs that will reduce the client's downtime and prevent it from being shut down.

Armor Metalstamp offers contract manufacturing services for custom metal stampings. Additional post-stamping services are available, including assembly, washing, machining, and deburring. Welding & plating are available internally and with our local supplier network.

Our stamping presses range from 100 – 1500 tons with the ability to process parts up to 36" in length and up to 72" in width. Part material thickness can range from 0.020" to .625" with maintaining tolerances of 0.002".
